Why Invest In This Fund

Established in 1997, Canso is an independent firm focused on bottom up security selection. Proprietary research developed over multiple market cycles guides the investment of approximately \$36 billion in AUM.

Each security is assessed on its own merits using bottom-up, fundamental research. Canso uses its proprietary Maximum Loss grade, where the max loss quantifies recovery value in the event of a default. The greater the potential downside, the lower the portfolio weight. Canso believes in concentrating their best ideas and having high conviction portfolios with limited holdings.

This independent credit expertise and successful investment management experience enables Canso to buy securities when they are out of favour and priced at a discount to their intrinsic value.

- **For Long Term Capital Growth** - Concentrated, high-conviction portfolio of value oriented global equity securities that the manager has identified as trading at a substantial discount to their intrinsic value.
- **Tax Efficient** - Returns from the portfolio normally consist primarily of capital gains.
- **Proven Investment Expertise** - Large investment team with experienced credit specialists with an expertise in determining default risks and recovery values of issuers to identify corporate bond opportunities. The continuity of the team has contributed to the successful management of investor portfolios over different market cycles.
