Investment Strategies

The Fund’s portfolio manager is Crusader Asset Management Inc. (“Portfolio Manager” or “Crusader”). The Fund’s portfolio will invest primarily in Canadian equity securities. The Fund will not be leveraged. The Fund may invest up to 30% of its assets in foreign securities. The Fund’s investments will not be

constrained by sector considerations. More details are contained in the Fund’s simplified prospectus.

Risks

The risks of this Fund remain as discussed in the Fund’s most recent simplified prospectus.

Results of Operations

The Fund returns for the six-month period ended June 30, 2024 were 7.64% for Series A, 8.24% for Series F and 8.73% for Series O. This compares favorably to the S&P/TSX Composite Index that returned 6.05% for the comparable period.

The net assets of the Fund were approximately \$10.5 million at June 30, 2024 from \$10.0 million at the beginning of the period. There were net redemptions of approximately \$154.7 thousand during the period.

The Fund’s performance was positively affected by portfolio holdings of energy and materials securities which were disproportionately larger than their representation in the S&P/TSX Composite Index. Energy and Material securities more generally outperformed the S&P/TSX Composite Index. While financials generally underperformed the S&P/TSX Composite Index, the Fund’s holdings of Canadian Western Bank led to material outperformance of the Fund’s financial securities when compared to the S&P/TSX Composite Index.

Modestly offsetting these positive attributions were substantial holdings of REIT securities. Securities in this sector of the market generally underperformed the S&P/TSX Composite Index.

Notes

- The information is derived from the Fund's unaudited semi-annual and/or audited annual financial statements. All per unit figures presented are referenced to net assets determined in accordance to IFRS.
- Net assets and distributions are based on the actual numbers of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per unit.
- Distributions were paid in cash or reinvested in additional units, or both.
- This information is provided at the end of the period shown.
- The management expense ratio is based on the total expenses of the period ended and is expressed as an annualized percentage of daily average net asset values during the period. Effective January 1, 2020, the Fund paid a management fee of 1.80% (formerly 2.00%) per annum for Series A units and 0.80% (formerly 1.00%) per annum for Series F units.
- The Fund's portfolio turnover rate indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is calculated based on the lesser of purchases or sales of securities divided by the weighted average market value of portfolio securities, excluding short term securities.
- The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
